NICOLLET COUNTY NURSERY, ST. PETER, MINNESOTA

MARCH 1937

We're announcing our new N C N NURSERY SALES ground in MANKATO, Minn. in April and May, at the West Mankato Hatchery, first place west of the Blue Earth River Bridge in Mankato south of pavement 169 known as No5. for your convenience. This service we know you'll OK as you have shown by the increasing patronage that

the Mankato and New Ulm folks has given our N C N NURSERY SALES ground in St. Peter on the third block up Broadway from Maine St. At both places we will heal a general line of our nursery stock into the cool moist soil where it'll be better off than if sprouting out yellow in a warmer aired cellar.

LANDSCAPE PLANS. of your home will be furnished you with estimate at a charge of \$3. but this will be credited back on the first \$25. purchase with a 10% discount on that amount. Aproportionate charge will be made for Cemetery and Park blue prints. We have landscaped the main homes and public institutions in this vacinity.

We GAURANTEE our nursery stock to reach customer in good condition and if it does not we are to be notified at once and we will make satisfactory replacement or a refund. Any other replacement is wrong as it makes the careful planter pay for the careless planters trees.

We WARRANT our stock to be true to name and in case it proves otherwise, we will upon proper proof, refurnish purchaser with such plants or trees free of charge or refund the money originally paid for same; but in no case shall we be liable for more than the original purchase price.

PRICES QUOTED are F.O.B. our nursery, sales ground in St. Peter or Mankato and subject to change and to being unsold upon receipt of order. For larger quantities, write us for special quotations. Assuring you that we will endeavor to merit your continued patronage, we are

Yours for better results,

E. Edwin Swenson & Son

PLANT NOVELTIES

ROCK MADWORT. A perennial that is almost a shrubby variety a foot high. A ball of yellow flowers continuous up to August. We drove 500 miles to see and find out from a specialist in perenial growing what the names of this flower was. We have a limited number to offer at 50¢ each.

POTENTILLA Fruitoca. Similiar to the above but with a rose like bloom. 35¢

VERBENA VENOSA. A lilac flower from June to Oct. Low perennial 25¢

FREDONIA GRAPES. Earlier and better eating A very productive new grape. 25¢

JAPANESE CHERRY. Compact bush about 5 feet with blush rose blossoms fallowed by wine red fruit that hangs on into fall. When the foliage has a high autum colloring. 50¢

HANSON'S IMPROVED SANDCHERRY. For Autum colloring and flowers and eatable fruit is more productive and easier to grow. 50¢

ROSA RUBRAPOLIO. A red leaf Rose with a striking appearane that stood the drought quite well. 18-24" 35¢

NEWBURGH RASPBERRY. Up to standard in size and productiveness and immune to mosaic. 35¢

DO NOT FORGET that we are headquarters for the DIETZ HARDY PRUNE. Hardy for 60 more years in this section. Worthy of your growing when it comes to quality and productiveness. 4-5' @80¢. 3 for \$2.

SHRUBS

HOW TO PLANT SHRUBS FOR EFFECT.

Plant along the foundation of the house, - the taller at corners, smaller under window in the corners of the walk, along the borders of the lot and enclose the back lawn, and so make an out door living room. Plant in groups of six irregularly, so they appear natural. You can get a very good assortment this spring while the price is reasonable.

BEAUTIFY YOUR HOME.

BARBERRY, Japanese. 4 foot. Thunbergii. entirely free from rust. A compact dwarf shrub for foundation planting. Facing shrub ahead of taller varieties. Foliage is fine green in spring changing to reddish in fall loaded with bright red berries that remain through winter when eaten by hungry birds.

BARBERRY, Red Leaf. 3 foot. This is the red form of Japanese Barberry. Is not as hardy.

BUCKTHORN 15-18' A thrifty grower. Dark green foliage with black berries. For hedge.

CARAGANA. (Siberian Pea Tree) 10-12' Grayish green leaves early bright yellow blossoms extremely hardy. Green stem and bark.

CISTENIA, Purple leaf cherry. 5-6' The dark red leaves makes a striking contrast.

COTONAESTER, Acutifolia. 5-6' Glossy dark green foliage that turns red in autumn.

HONEYSUCKLE, Pink or white Tartarian 8-10' Either color attractive in May followed by red berries which is relished by birds. It is the easiest shrub to grow under trees.

HONEYSUCKLE MARROWII. 5-6' Spreading habit Cream white flowers followed by red berry.

HYDRANGEA A. G. 4' "Snow Hill Hydrangea" Large showy white flowers from midsummer on

HYDRANGEA P. G. 6' The pinkish white pointed hydrangea that will make a winter bouquet.

HIGH BUSH CRANBERRY. 10-12' A Spreading grower that is very showy - red berries.

Elder GOLDEN & CUT LEAF. 10' Both these are planted for foliage effect and like the golden mock orange should be planted in sun for best coloring of golden leaves.

LILAC, Persian. The slender branches drooping the blossoms makes this small leaved lilac the most planted as does not sucker.

LILAC FRENCH. 6-8' Chas Jolly - Double red. L. Spaeth - S. Purple. Md LeMoine D. white.

MOCK ORANGE, Conaricus 9-10' Large white.

MOCK ORANGE, Dwarf 2-3' A fragrant white.

MOCK ORANGE, Golden 5' Yellow leaved in early spring. white flowers.

MOCK ORANGE, LeMoine. 4-5' Semi dwarf with dense racemes of fragrant white flowers.

MOCK ORANGE, Virginalis. 7-8' Loaded down with fragrant double white flowers.

SNOW BERRY or CORRAL BERRY. Both nearly of the same foliage and 4-5 foot. Former is white and the later has red berries.

POTENTILLA FRUITOCOSA. 2' Shrub like perennial with yellow double blossom from June until fall.

LANTANA. (Wayfaring tree) 10-12' Lilac in appearance and bloom after lilacs are done Large white bloom in spite of the draught.

RUSSIAN OLIVE. 10-18' Grey green foliage. Splended for a back ground.

SPIREA Anthony Waterer, and **FROEBELLA** 2' Former is smaller shrub and deeper pink bloom. Later is larger and hardier shrub.

SPIREA, Arguta. 4-5' (Snow of Garland.) small light green leaves covered with loads of white flowers in April & May.

SPIREA BILLARDIA. 5' Bright pink spikes of fussy bloom in July - September.

SPIREA Van Houttei. 6' Commonly called Bridal Wreath. The most popular shrub. Loaded with snow white bloom. Used for foundation grouping and mass planting.

TAMERIX, Amurensis. 8' A beautiful shrub with lace-like foliage. Clusters of pink flowers. Becoming a popular shrub.

APPLES

ANOKA. Early bearing. Fall Apple, very hardy. Quality Good. Bore in nursery row.

Red DELICIOUS. In protected places this is hardy enough to bear fruit that's real good.

DUTCHESS & RED DUTCHESS. One more red than the other. Old early reliable tree.

BRICKSON. Earlier, larger than Dutchess Red hardy tree with strong shoulders.

MAROLDSON. Best winter apple of first in hardiness. A good keeper of very good eating qualities. Franchised out wide with strong shoulders. Size and color like the Weibull. A lot of very good keeping qualities. Brought out by the Minn Fruit Experiment Station. Introduced by the Minn Fruit Experiment Station. Introduced by the Minn Fruit Experiment Station.

VIRGINIA crab. Also known as the Virginia crab. are two of the hardiest trees. Brought out by the Minn Fruit Experiment Station. Introduced by the Minn Fruit Experiment Station. Introduced by the Minn Fruit Experiment Station.

Mc. INTOSH, Sept to Jan. Bright deep red. Good size and quality. Second Hardiness.

MALINDA. Heaviest bearing, longest keeping and hardiest apple of the north that keeps.

NORTHWESTERN GREENING? WEALTHY, WHITNEY, TRACENDANT, and EARLY STRAWBERRY crab do not need any further description.

SALOME. Similar to Delicious in color & shape, and taste but with yellow flesh. bears annually sticks on tree and is hardy.

YELLOW TRANSPARENT. The earliest apple. Destined to be replaced by the Erickson.

CORTLAND. A new apple of improvement but similar to Mc Intosh. Fast grower- bears the fourth year fruit that adheres firmly to the tree.

Size	each	per 10
4-5 foot	\$.65	\$6.00
5-7 foot	.80	7.50

(Except where noted and Dolga or Anoka apple and the Dietz Hardy price add 5¢)

UNDERWOOD plum. Large early and good eating. A quick bearer.

WANETA Prof Hanson's best plum. Immense size. Good keeping quality. Early bearer.

LACRESCENT. Largest yellow plum for Minn.

SUPERIOR. Midseason. Another large yellow plum with pit freestone. Very productive.

MONITOR. New large annual bearing plum of a good quality - Red with yellow flesh.

KAGA. An improvement of the apricot tasting Hanska, being longer lived, heavier bearer and good pollinizing value.

SAPA. Prof Hanson's best hybrids of purple flesh that makes very good sauce.

COMPASS Cherry. Half plum and cherry. Its fruit is good for sauce and quick to bear and good pollinizer.

OKA CHERRY. Very heavy annual bearer even first year after setting of a rich purple red cherries. Dwarf hardy. 3-4' @ 75¢.

PARKER PEAR. Minn Nol. This pear seems to be one of the few pears tried out in Minn. that is worth while. Very large and hardy.

HANSON'S IMPROVED SANCHEERRY. Years of selections gives us a larger and more productive. Dwarf 2' @ 50¢ each.

DIETZ HARDY PRUNE. Brought over by older Aug Dietz from Germany when he homesteaded in Kelso township, Sibley county years ago. Trees heavy in clusters of prunes that stick on tree until picked. Sauce is the best. Healthier as tree is more disease immune. Trees are small not over 10 feet so does not need much room. The first tree planted 23 years ago is yet alive bearing fruit in spite of the fact that it was 10 years old still they are bearing fruit annually. Introduced by the only nursery selling them for sale in the state. (Minn Fruit Experiment Station) nursery for preparing small trees.

EVERGREENS

SHADE TREES

The last years have thought us what evergreens are dependable in Minnesota. Some in various soils. Some died in the best of soil conditions in protected places, so when selecting evergreens be sure of your soil and variety for final growth.

JUNIPER Cannarti. A Deep green trimmed pyramidal that takes the place of Arborvit.

JUNIPER Dundee A Hills grafted pyramidal trimmed that takes on a purple winter color

JUNIPER V Glauca. Grafted pyramidal that has a bluish winter color. Not to be confused with Colorado Silver Cedar that is not hardy on our prairies.

PINE Austrian. One of our best for lawn planting. Erect growth with long needles.

PINE Dwarf Mugho. Can be trimmed, left on the corners untrimmed, near the entrance or grouped on corner of front lawn.

SPRUCE Black Hill. Native of the bad land A most rugged spruce for the northwest. Is more compact thus makes the better shelter.

SPRUCE Colorado Blue. 86% of trees grown is of green color. 14% is a good average for a select blue. Green ones we sell for windbreak purpose. Come select your blues.

SPRUCE, Norway Spuce. The cheapest but not the best for droughty seasons.

JUNIPER Pfitzers. A fantastic dwarf growing evergreen of good green color. Very useful for foundation grouping. Juniper Andora and Cumunis, diffent dwarf & Colors Juniper Savine-Angel her deer green Dwarf

ELM, Chinese. In China trees are found that is said to be 300 years old. Its fine leaves does not litter up the place and is beautiful. In two years, 2 foot seedlings grow in the nursery row to 8 and 9 foot. Do not plant in low, wet land; but higher ground. Do not cultivate late.

ELM, American. Most dependable tree. One stands on my Grandmothers homestead that requires three men to encircle - How old?? This throws a shade 67 feet across. With its drooping branches its a land-mark.

ELM, Moline. Is a large dark leaved elm that at a glance you notice it's odd.

BIRCH, Cut Leaf Weeping. A most stately tree having white bark and hanging cut leaf foliage. A beautiful lawn tree.

CRAB, Dolga. A quick bearing tree with white flowers. Bright red fruit that is planted as ornamental and for its jelly.

CRAB, Hopa. The deep pink flowers are followed with bright red fruit that hang on for weeks. The end leaves are red.

MAPLE, Hard. Perfect shaped tree. Deeply lobed green leaves turning to yellow and redish hue in autumn.

MAPLE, Schwedlerii. Red leaves in spring ASH, Mountain European. Small smooth bark tree that fits the small lawn, Red berries

POPLAR, Bolleana. Smooth gray green bark, maple leaves, dark green on top, white beneath. Plant one for sky line effect.

POPLAR Simonds. The erect growing willow leaved poplar. Both grows straight up.

WILLOW, Niobe Golden Weeping. Hardest.

10 FACTS WORTH KNOWING

1. We have no agents. - One of the highest items in overhead expenses in the nursery business that goes to make the price.
2. Most our NC Nursery stock is fresh dug in the spring and healed into the moist cool soil. **Our experience has proved** that this is the best method of keeping stock dormant and in best possible planting condition.
3. Most our NC Nursery stock is grown on black virgin soil giving us sturdier stock
4. We have a general line of nursery stock with fairly wide range of varieties.
5. There is no nursery regardless of size that grows every item and size they sell.
6. We grow most of ours. We have the privilege of selecting the stock we are forced to buy or exchange for of the local nurseries in which case our experience in selecting good stock assures you of the highest grade nursery stock.
7. Sold nursery stock for 42 years. Grown NCN Stock for 29 years.
8. You can only buy N C Nursery stock at our nursery, or at our N C Nursery Sales grounds in St. Peter on 4th block up on Broadway from the Minnesota River bridge, or at the West Mankato Hatchery the first place west of the Blue Earth River bridge in Mankato and first place south of the pavement No. 169 or Old No 5.
9. In planting, your tree will grow with less watering if you soak the subsoil by filling the hole level full of water and let soak in before planting the tree
10. Our Nursery is $10\frac{1}{2}$ miles NW of St. Peter
